

how to make a scene onAlice

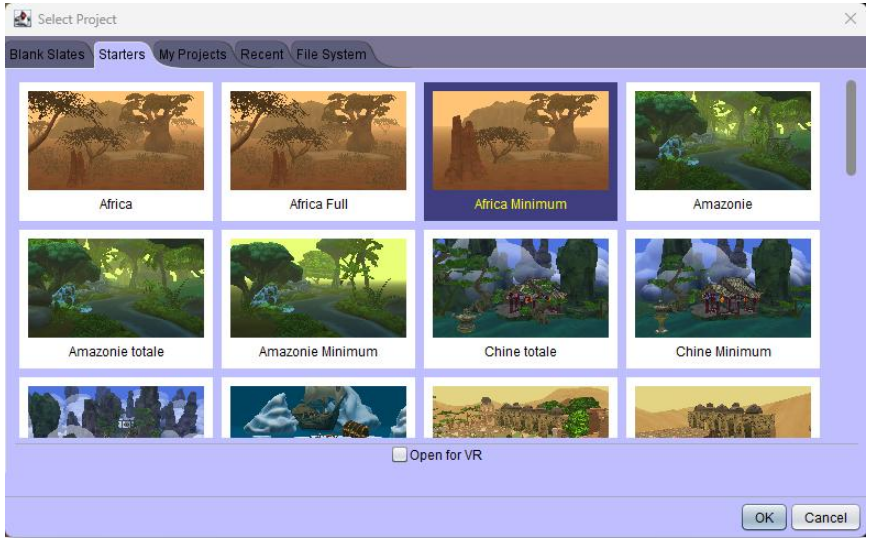

Pour commencer, ouvrir le logiciel Alice 3 dans le dossier STI2D

Nous allons recréer un scène de Jumanji

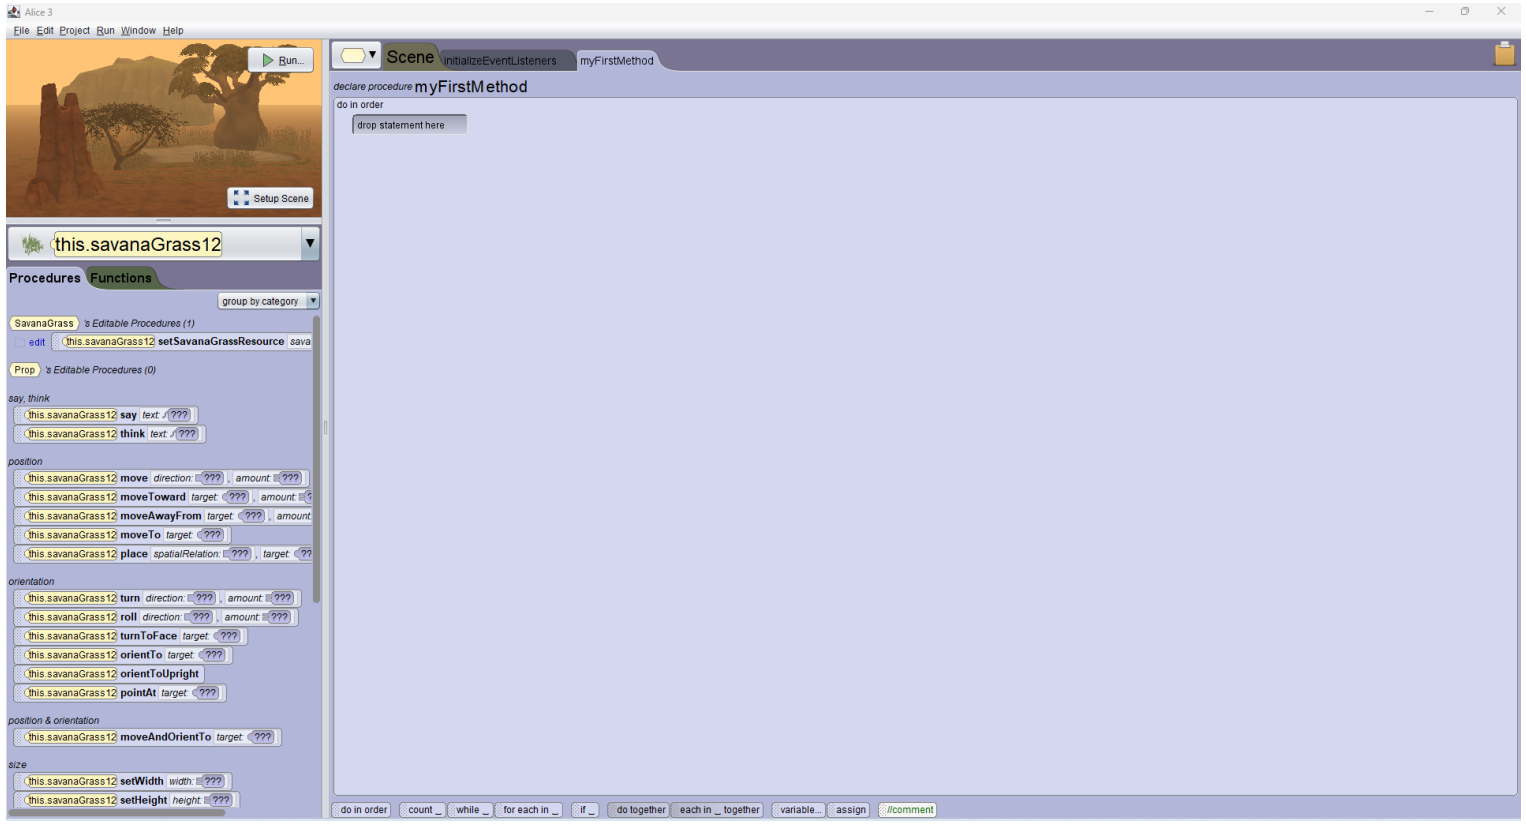

- When alice is open, a little window opening :

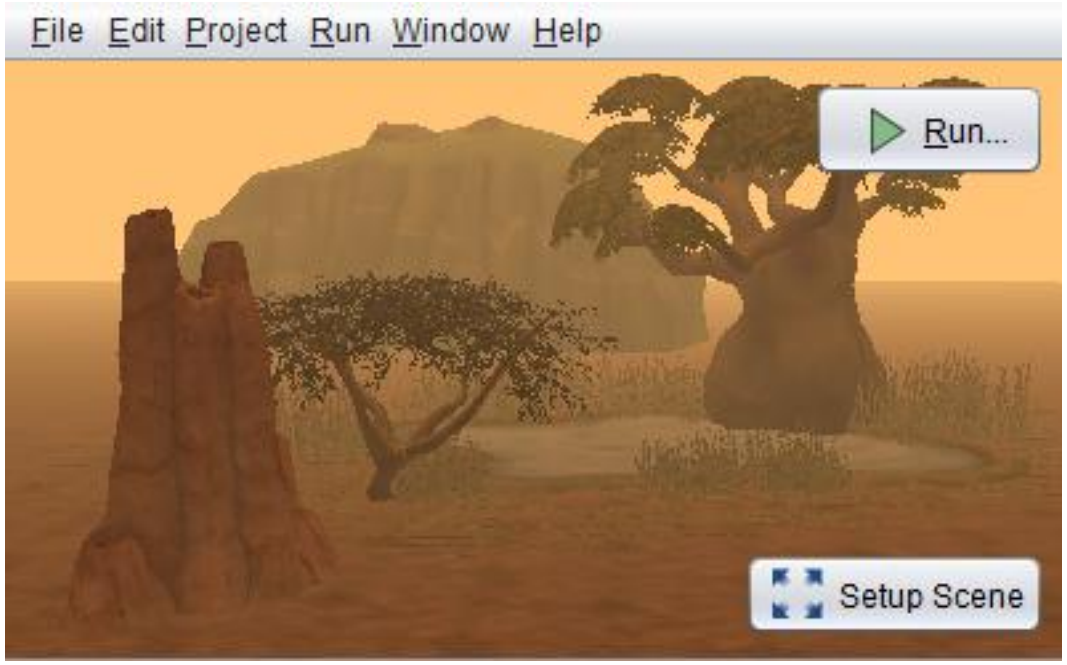

- Click on the starters window and select Africa minimum

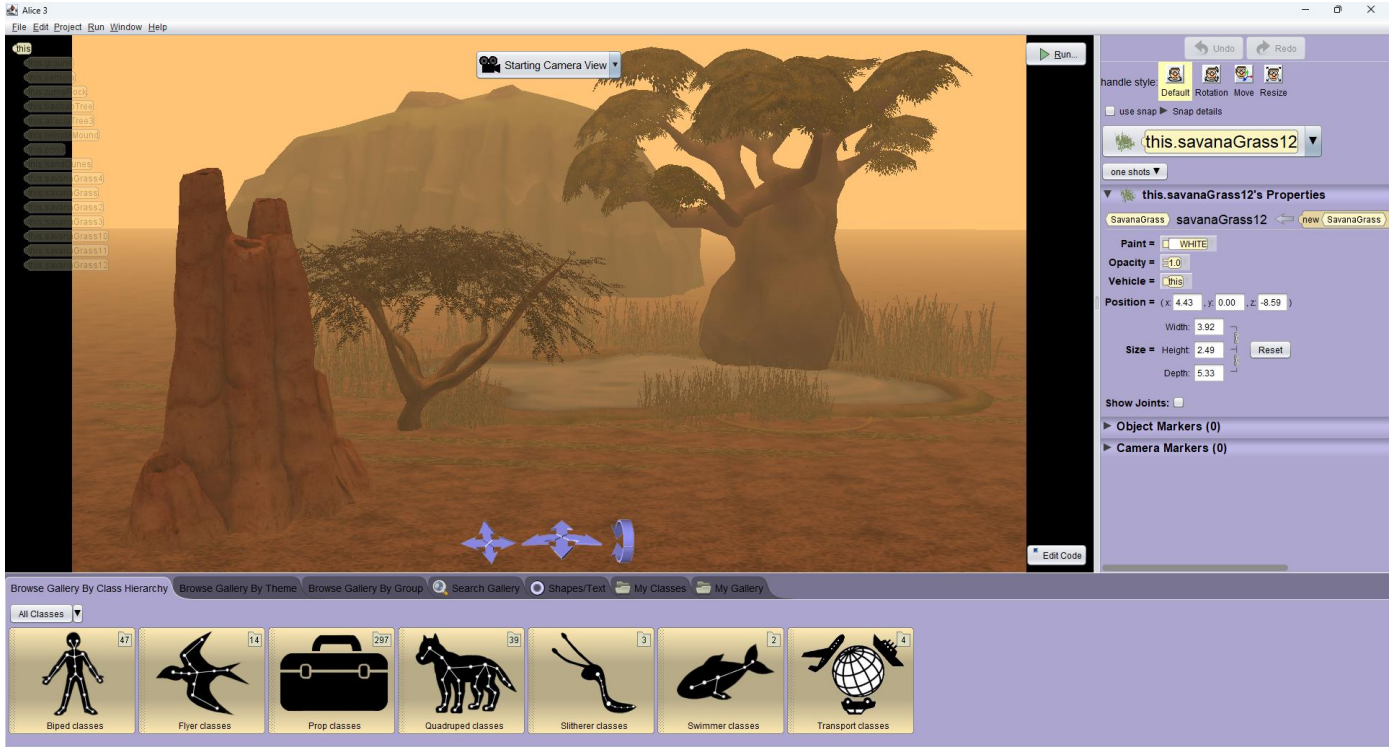

After click on the Africa minimum, you have this overview.

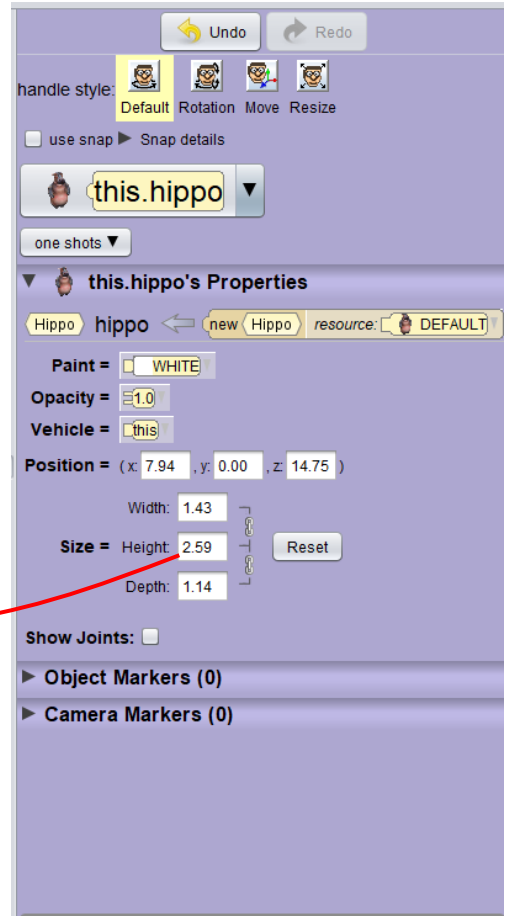

Put object in the scene, your click on the setup scene button.

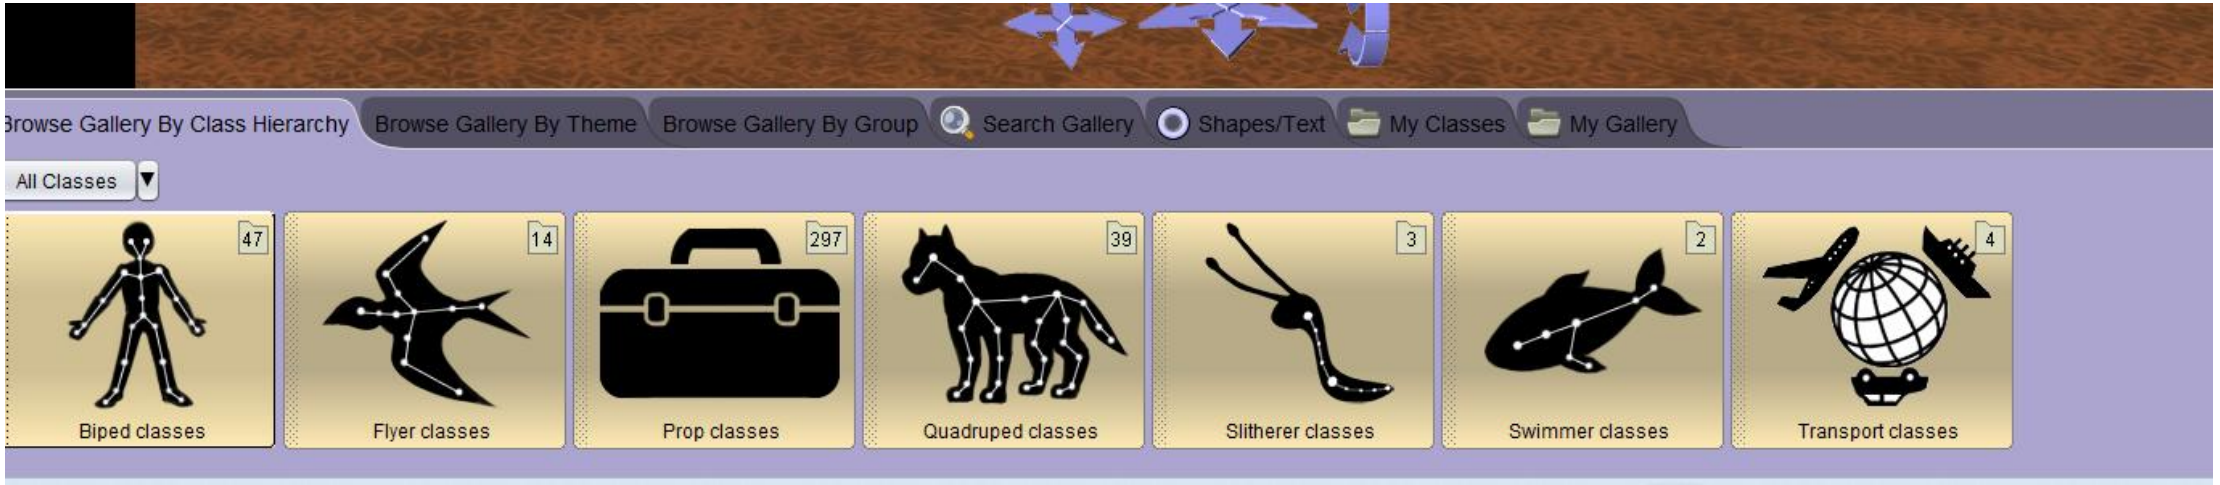

to put a hippo in the scene, go in the quatruped classes file and found the hippo

to change the properties of the hippopotamus, a window on the right if found. For the size you enter six in the central window

So you would like to add a wood, found in the prop classes file.

For move the hippo, you click on this and put everything as you wish

the hippo must be placed like this

Now place a human in the scene. In the biped classes file found. you can customize it as you wish.

to move the human, it’s the same approach as for the hippopotamus
