

Alice

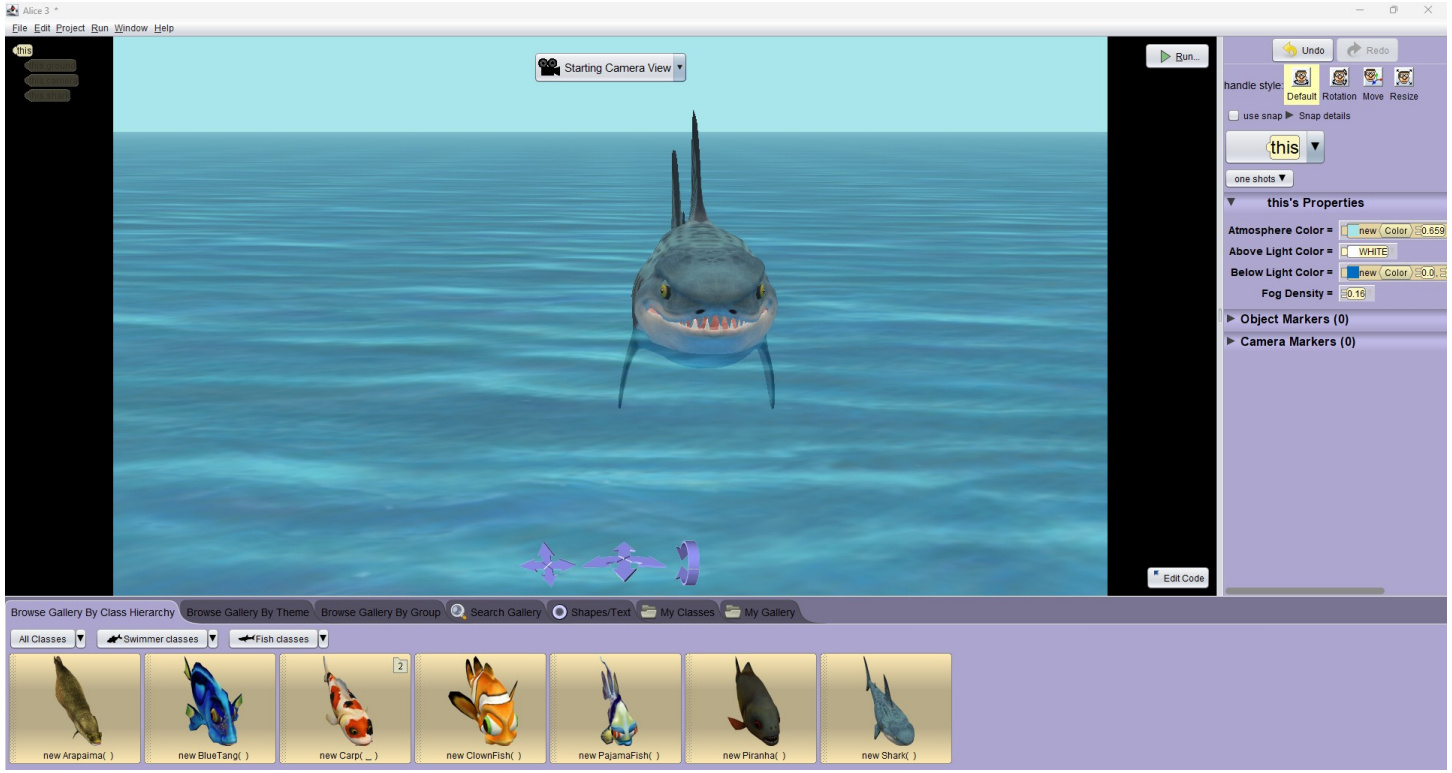

JAWS

Verez Jules – TSTI2D

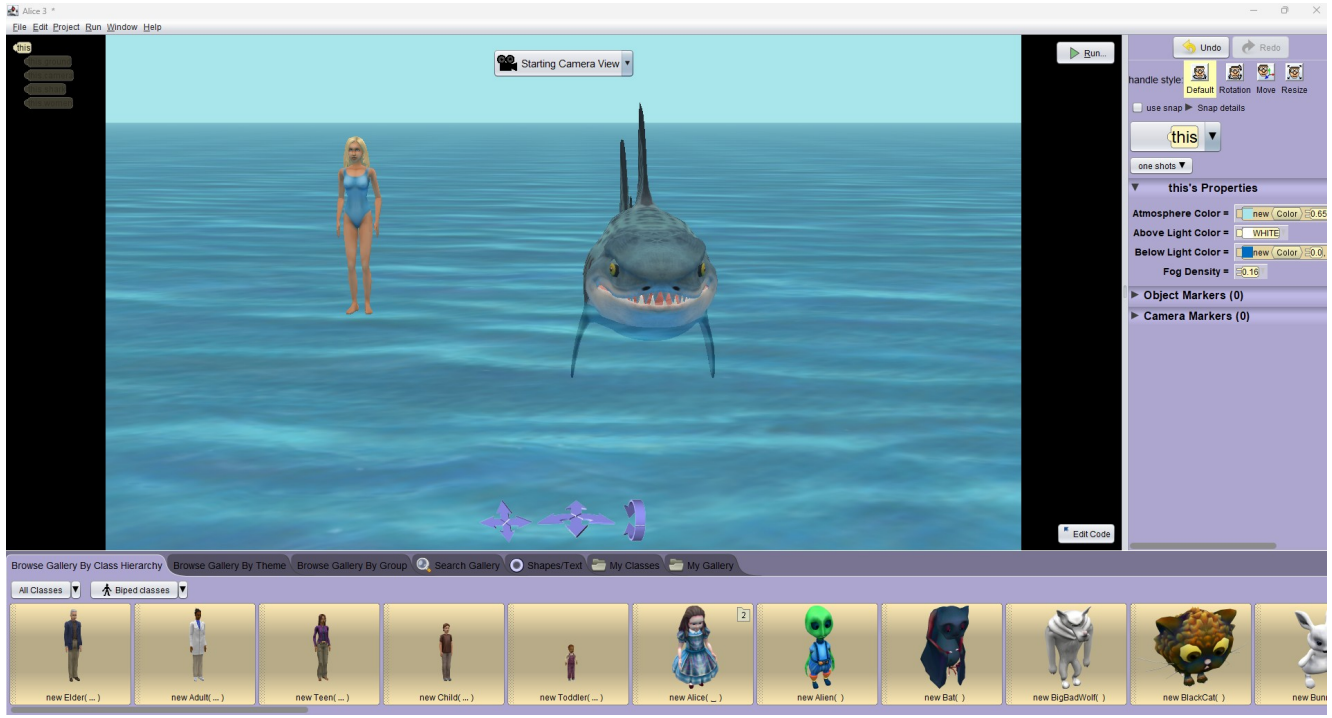

This is the starting camera view, you can see down the different composant for exemple animals or objects.

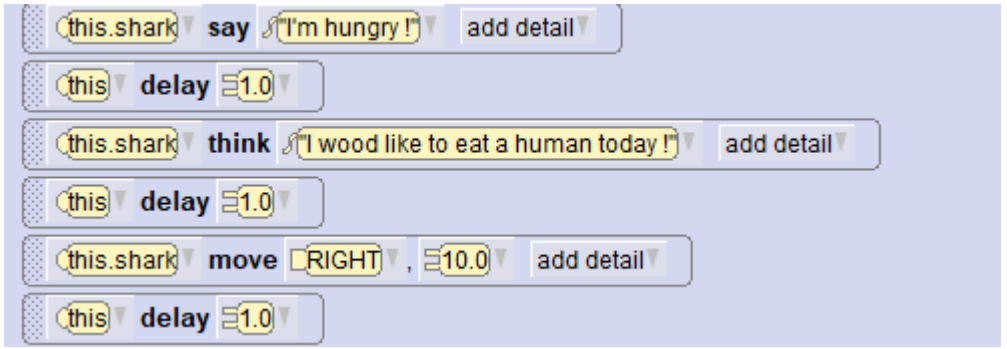

This is the view with the shark, the « main character » of the scene.

This is the view with the shark and the women .

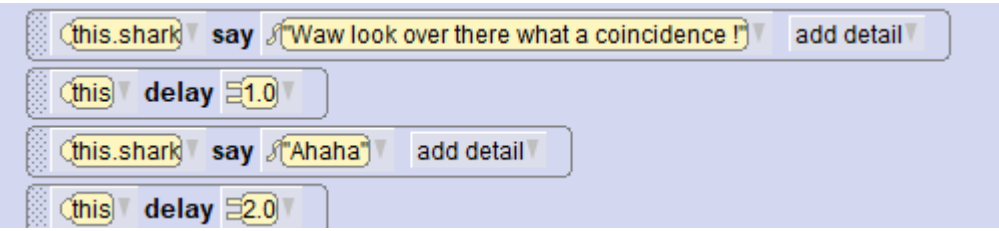

Now we can debut the programme :

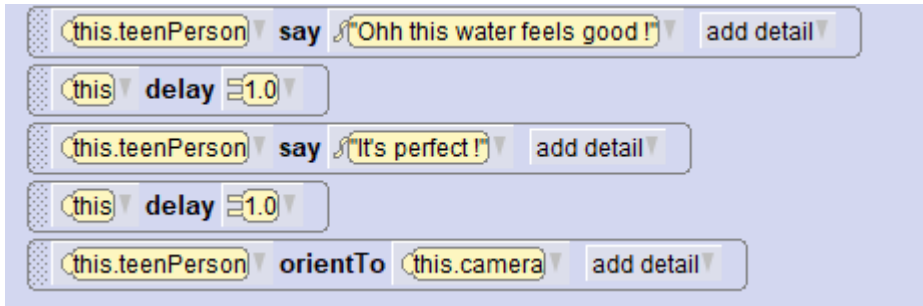

The shark speak and move right.

The shark luckly encounters a women in the sea.

The women is swiming peacefully .

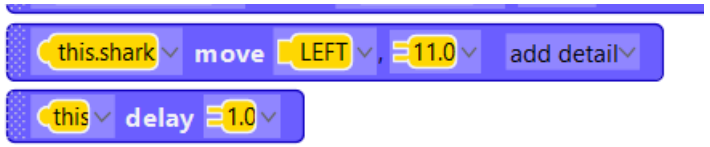

The women turn around and see the shark behind her

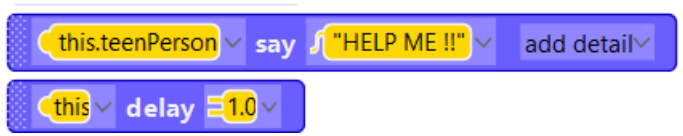

The women try to escape the shark, she goes on the right then she goes forward.

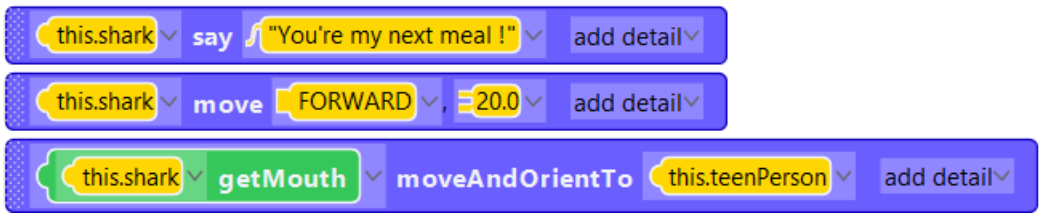

The shark follow the women

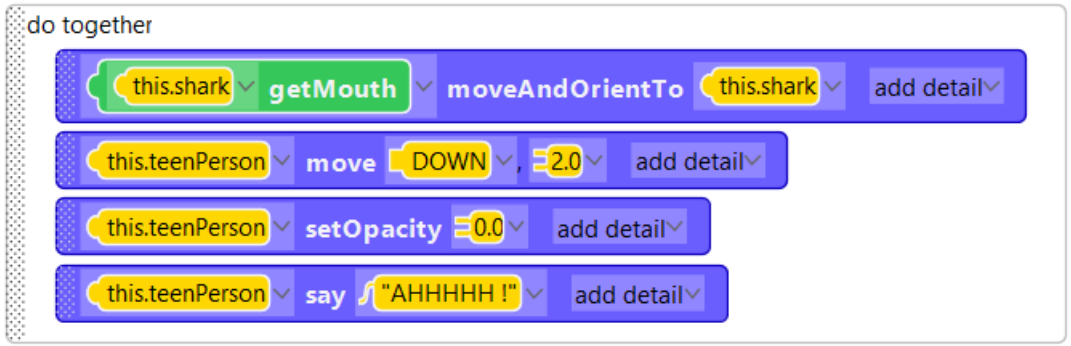

When the shark arrive to her, she scream for help.

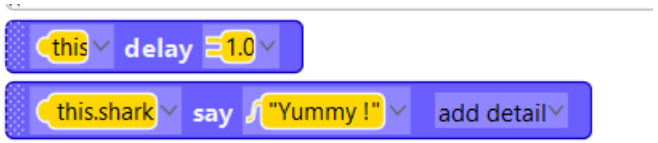

The shark say that she’s his next meal, he goes froward to be to her level and open the mouth for eat her.

The shark open is mouth as big as he can, he eat her but during that she scream with her last breath.

The shark get what he want as his meal, his last word is « Yummy », after eating the women.

Conclusion :

This scene is inspired by the movie « JAWS ». Which has a scene where a shark is eating a women in the sea.

I tried to recreate this scene with the scary situation of a shark who appears in the sea while a women was swimming. In this movie we have an anxious feeling asking ourselves if the shark gonna kill someone and in my history I decided to do a tragic end with that women.

Thanks for watching.
