TUTO THORFINN'S DAGGER

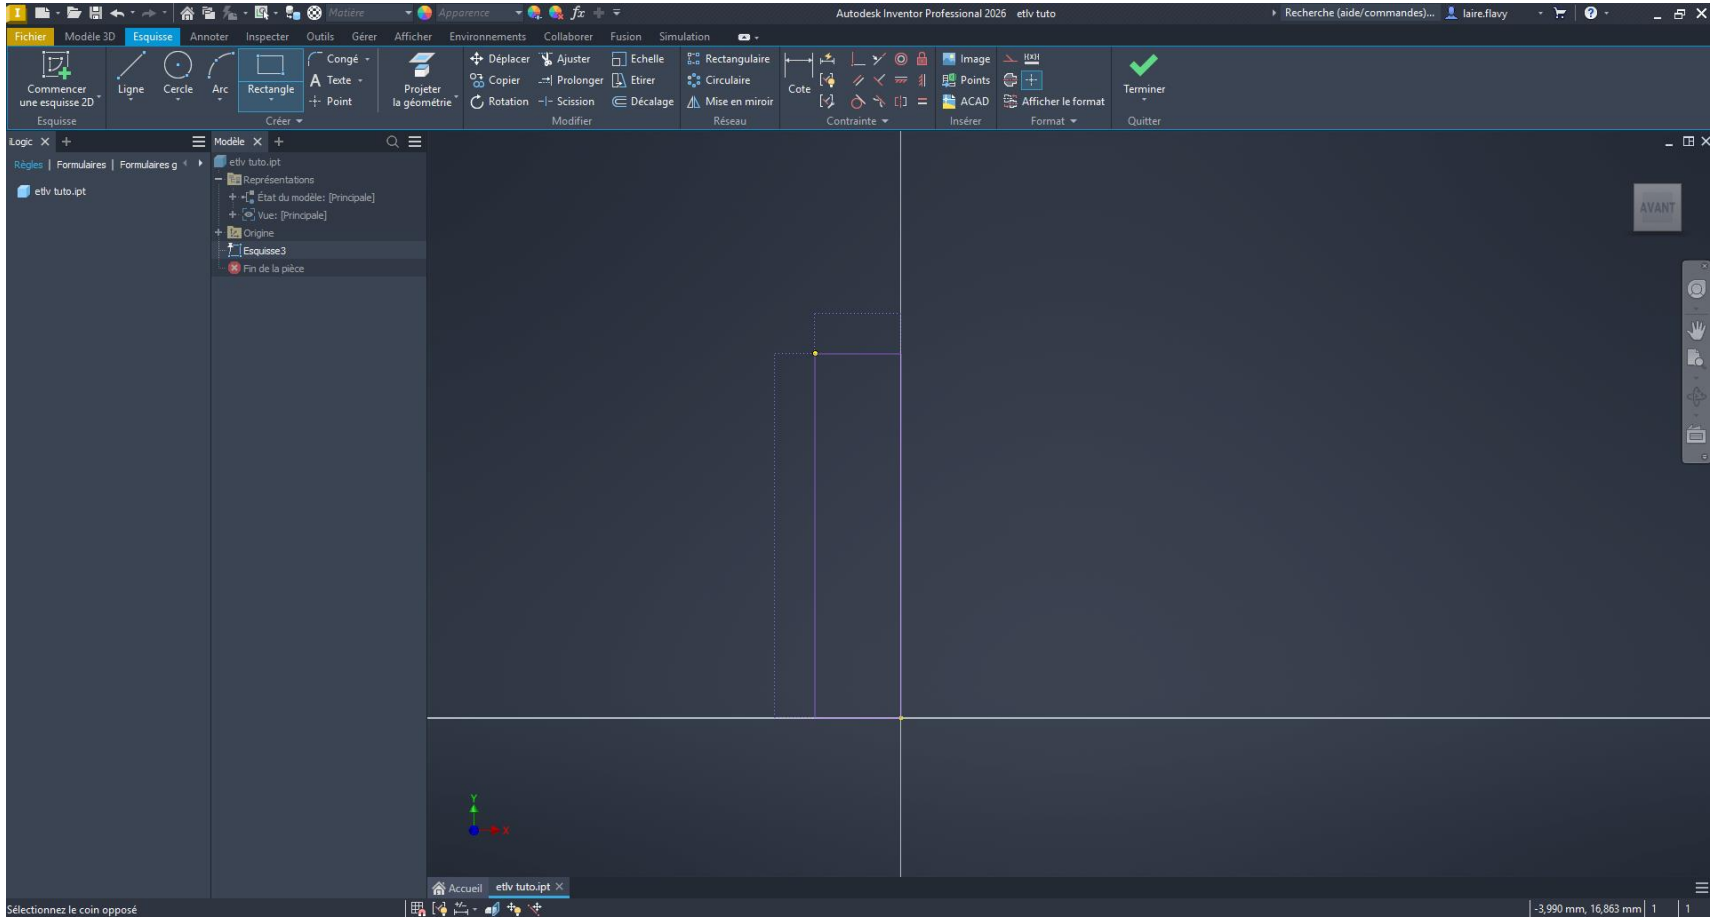

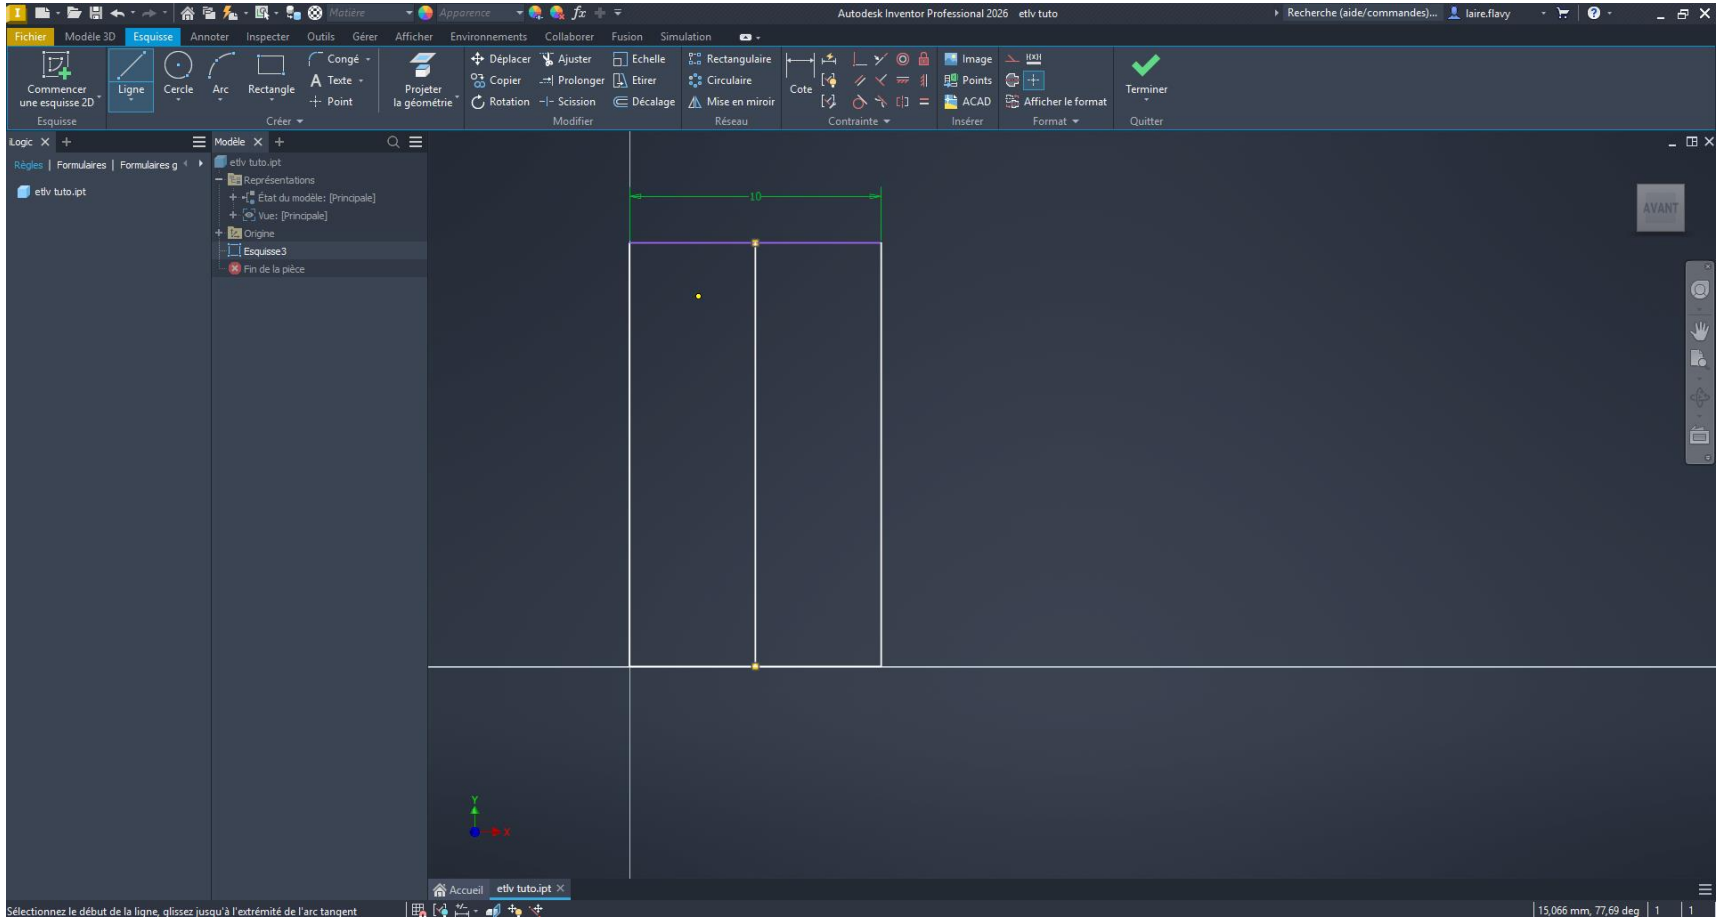

Choose standare.ipt

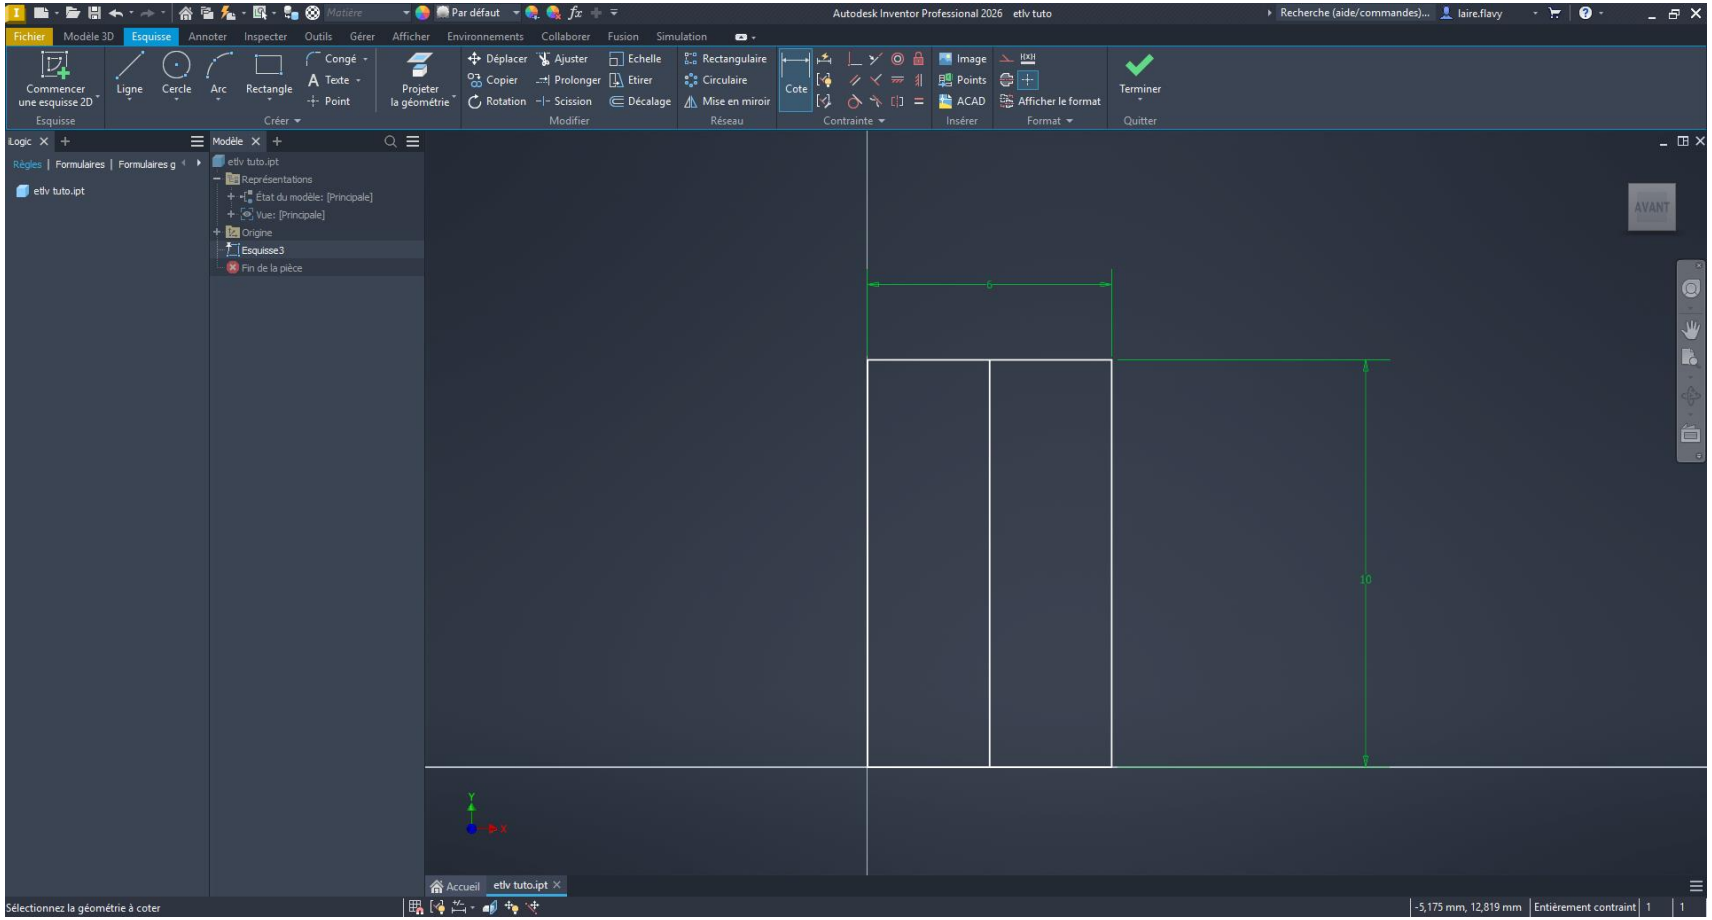

Draw a rectangle using the « rectangle too »

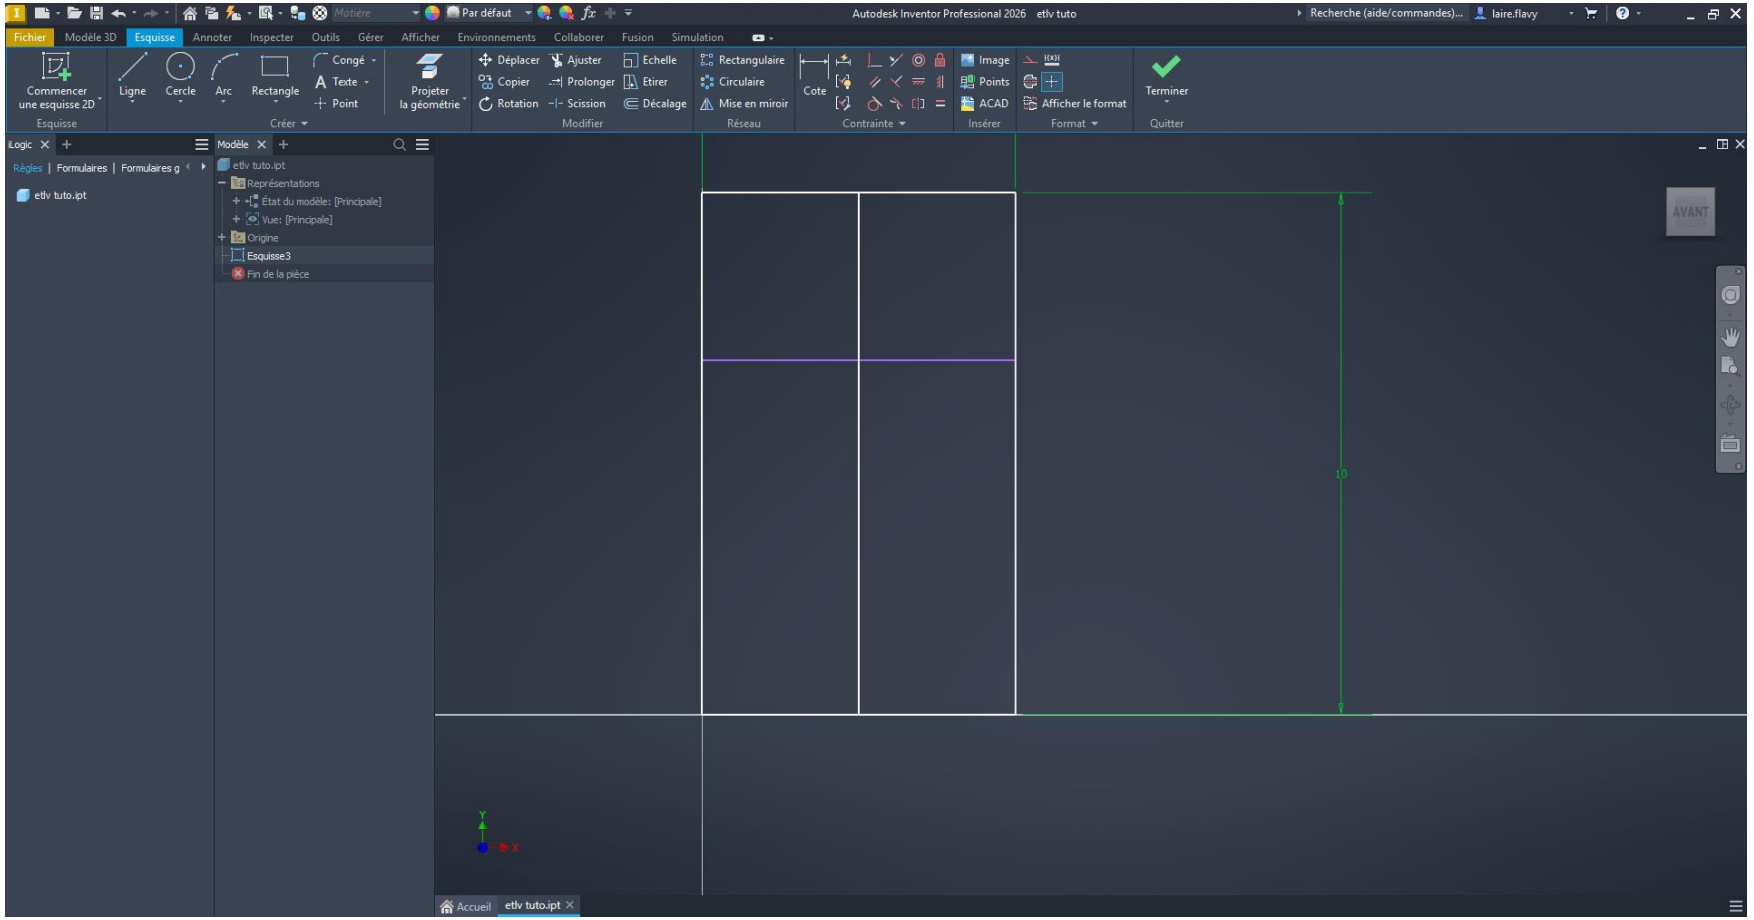

Using the « dimension » tool, set the width to 5mm

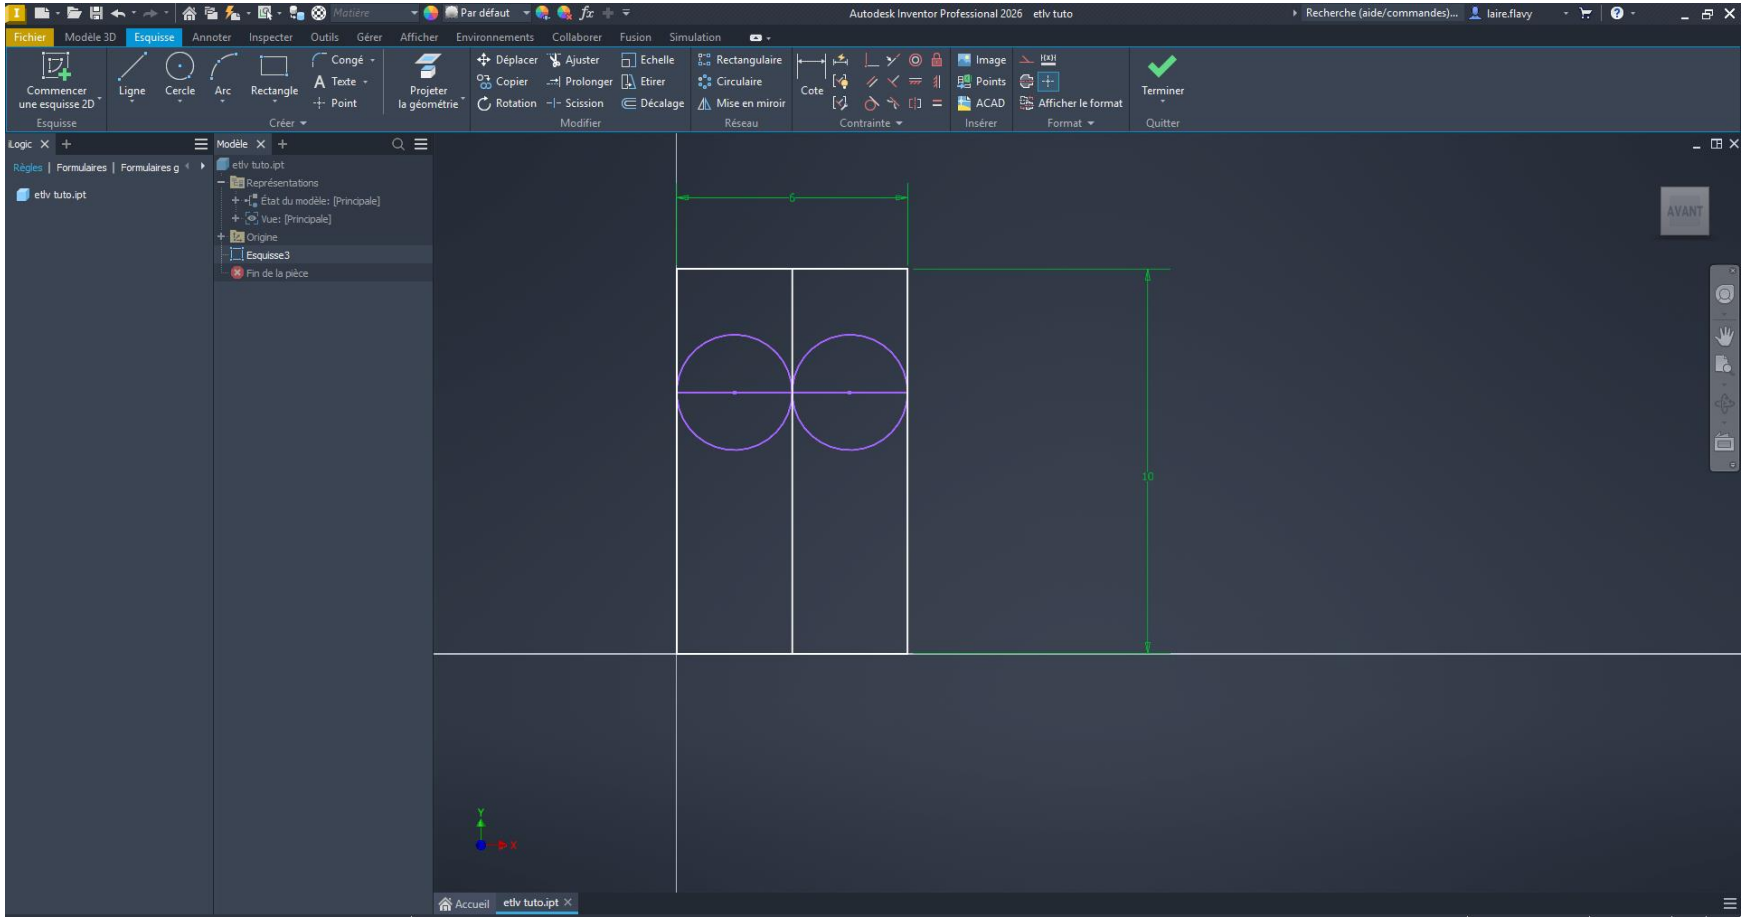

And 10mm high. Draw a ligne in the middle

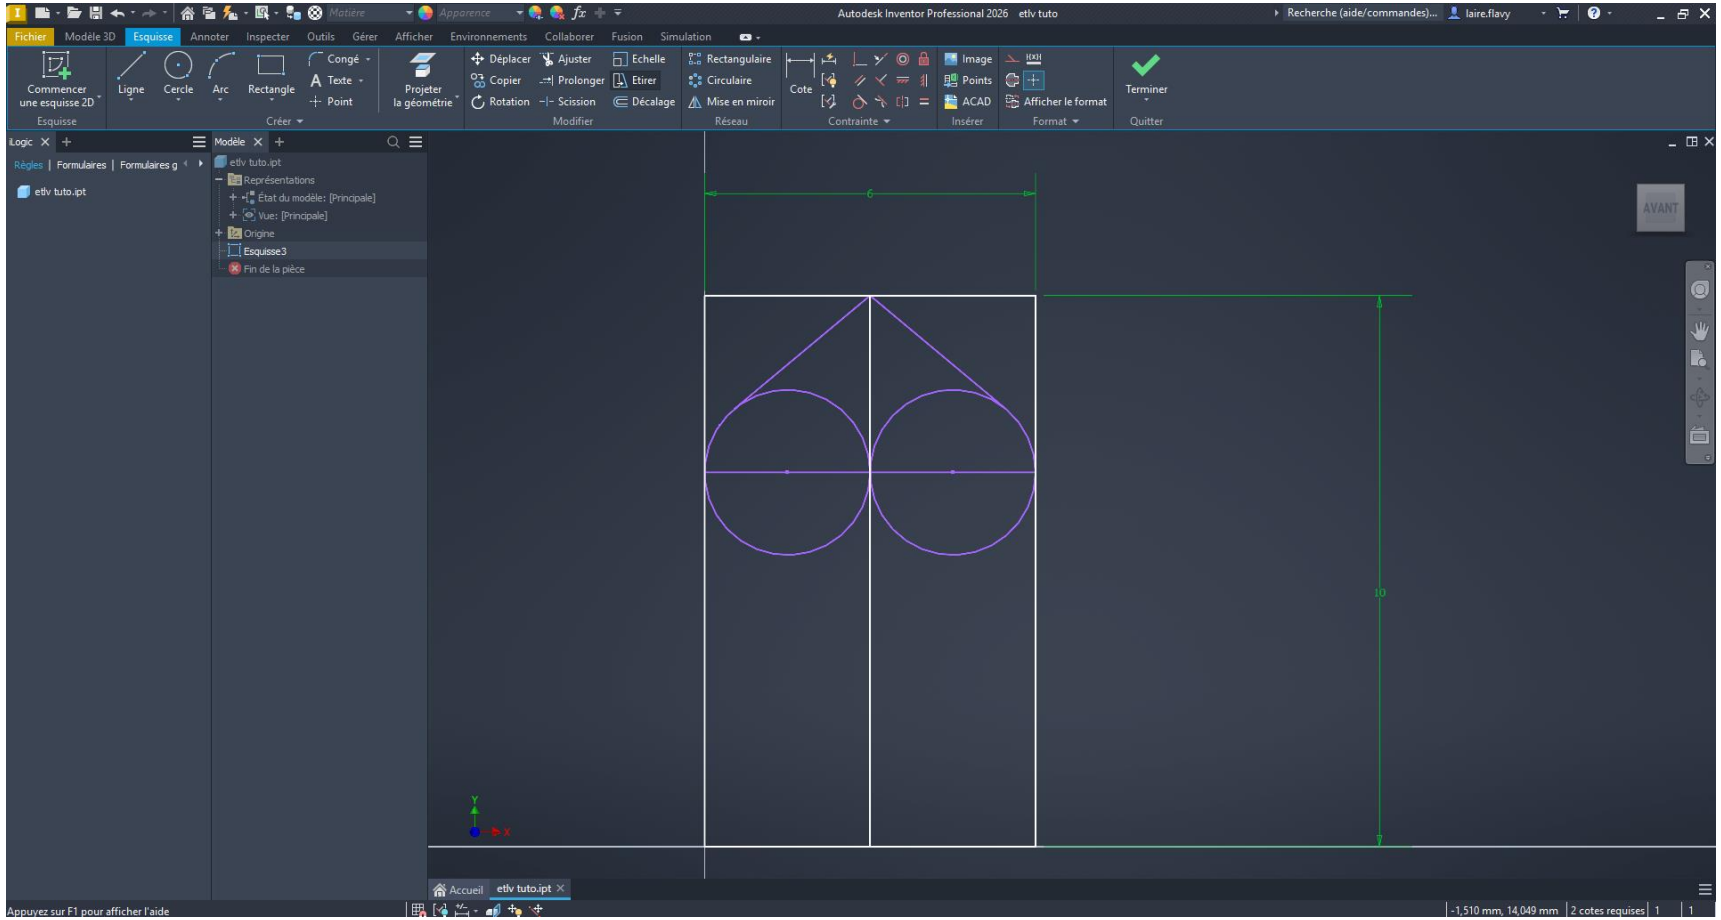

then draw a line at one-third of the rectangle's height

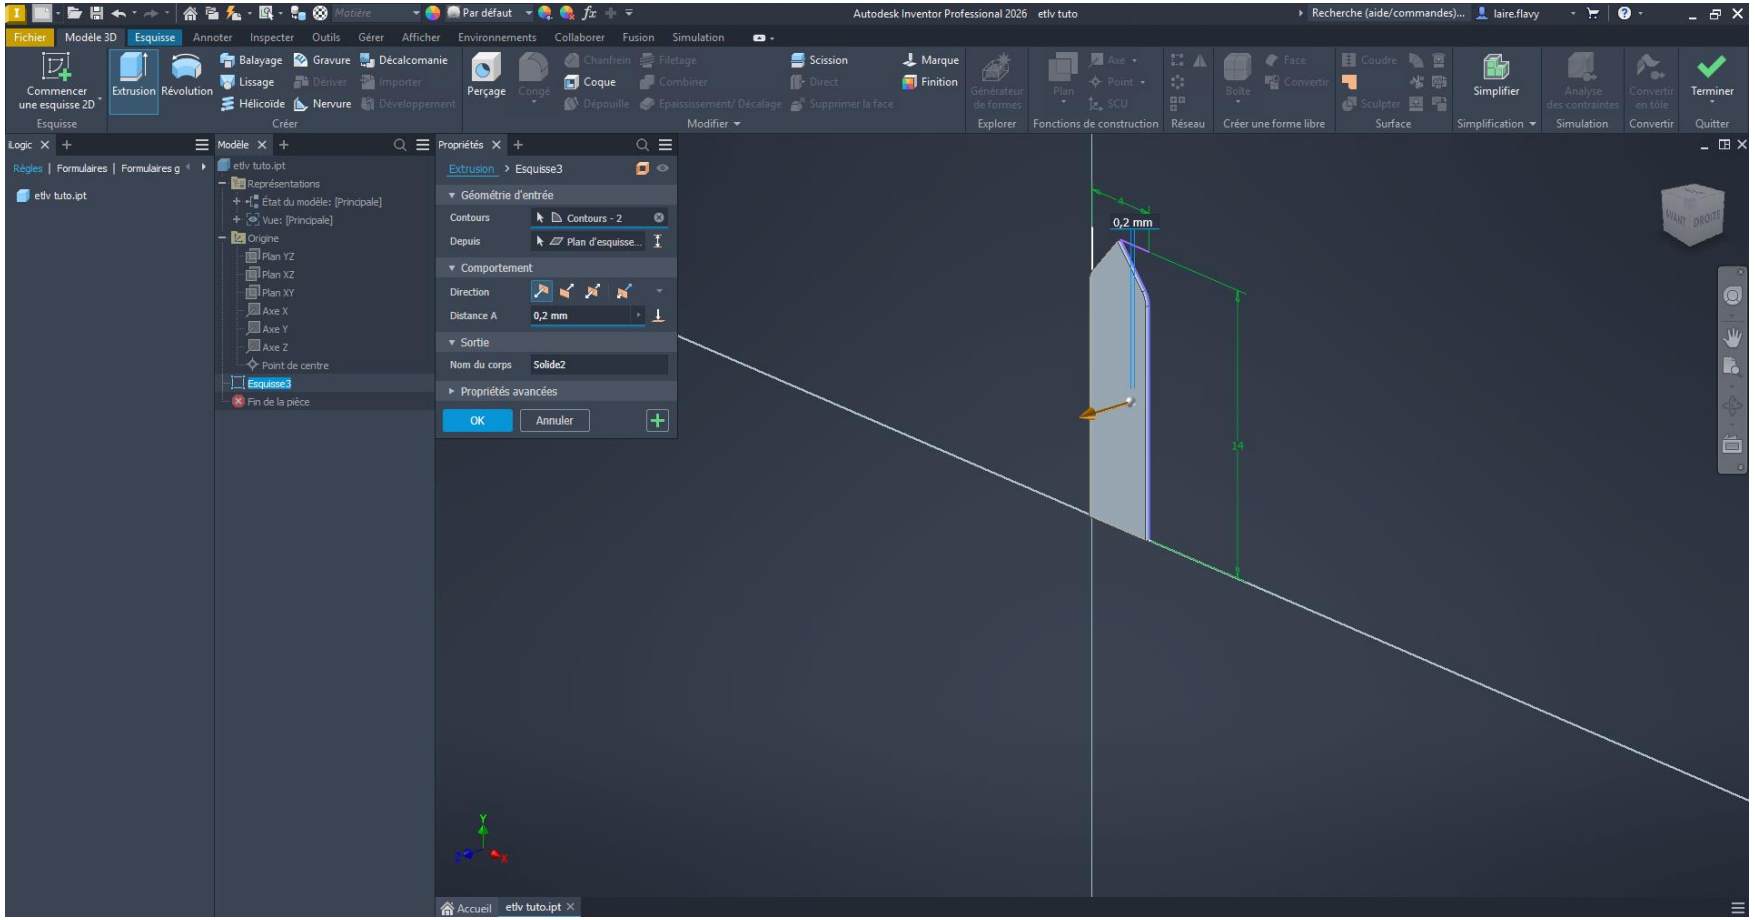

Draw two circles like this

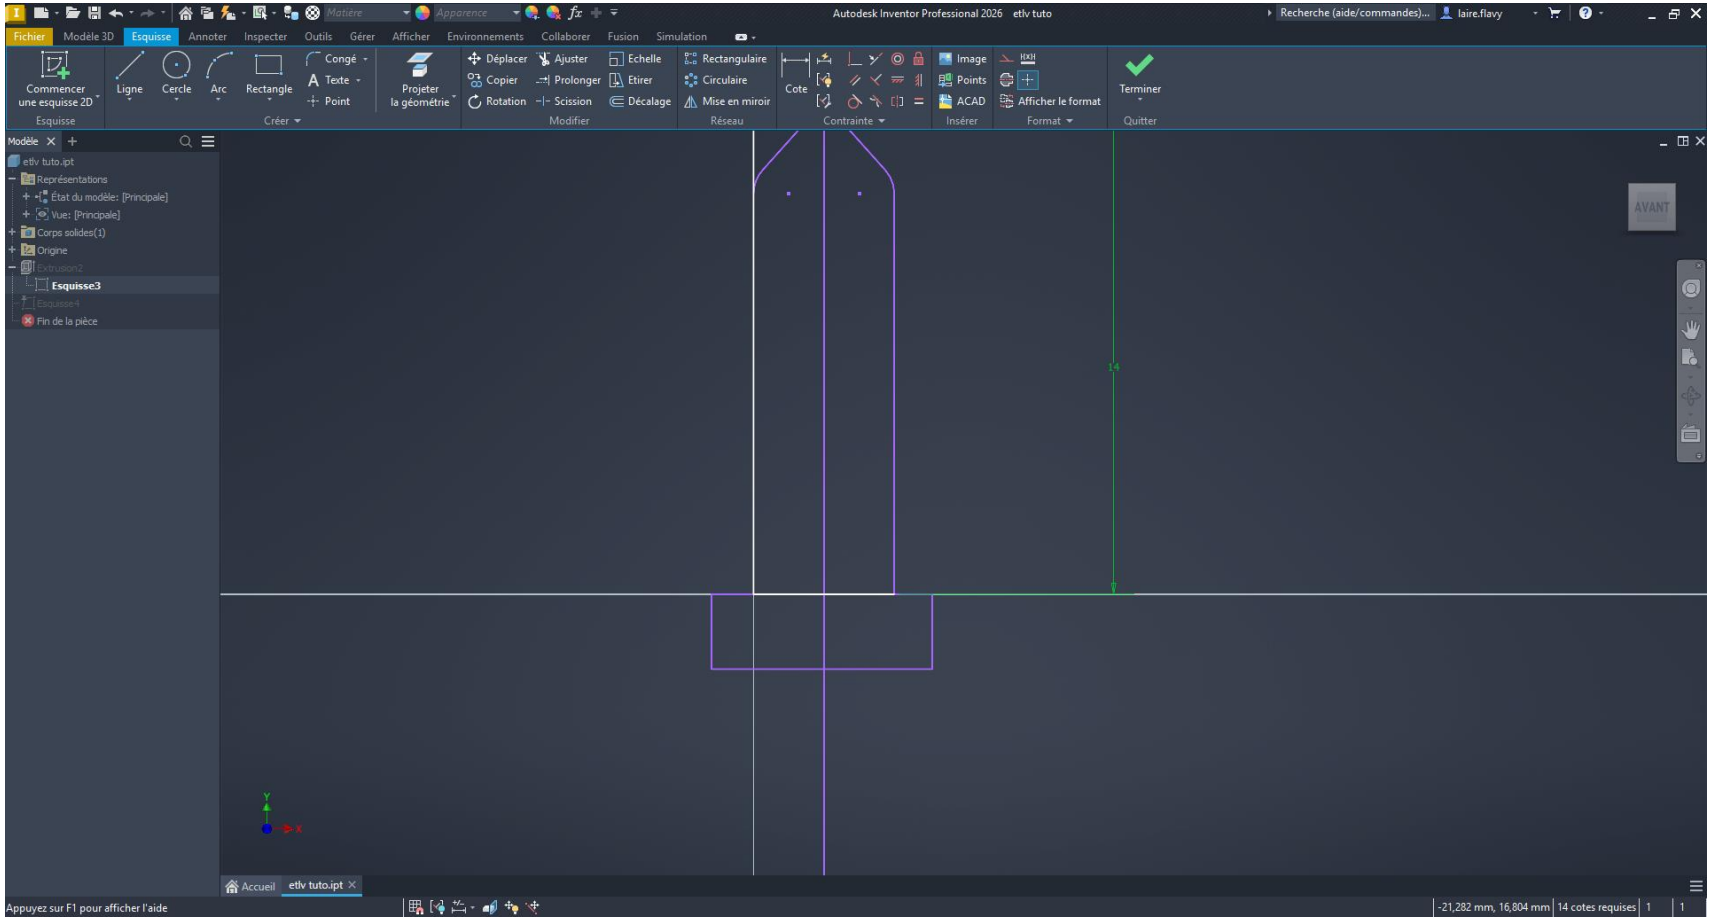

Draw two lines starting from the circles and meeting at the center of the rectangle

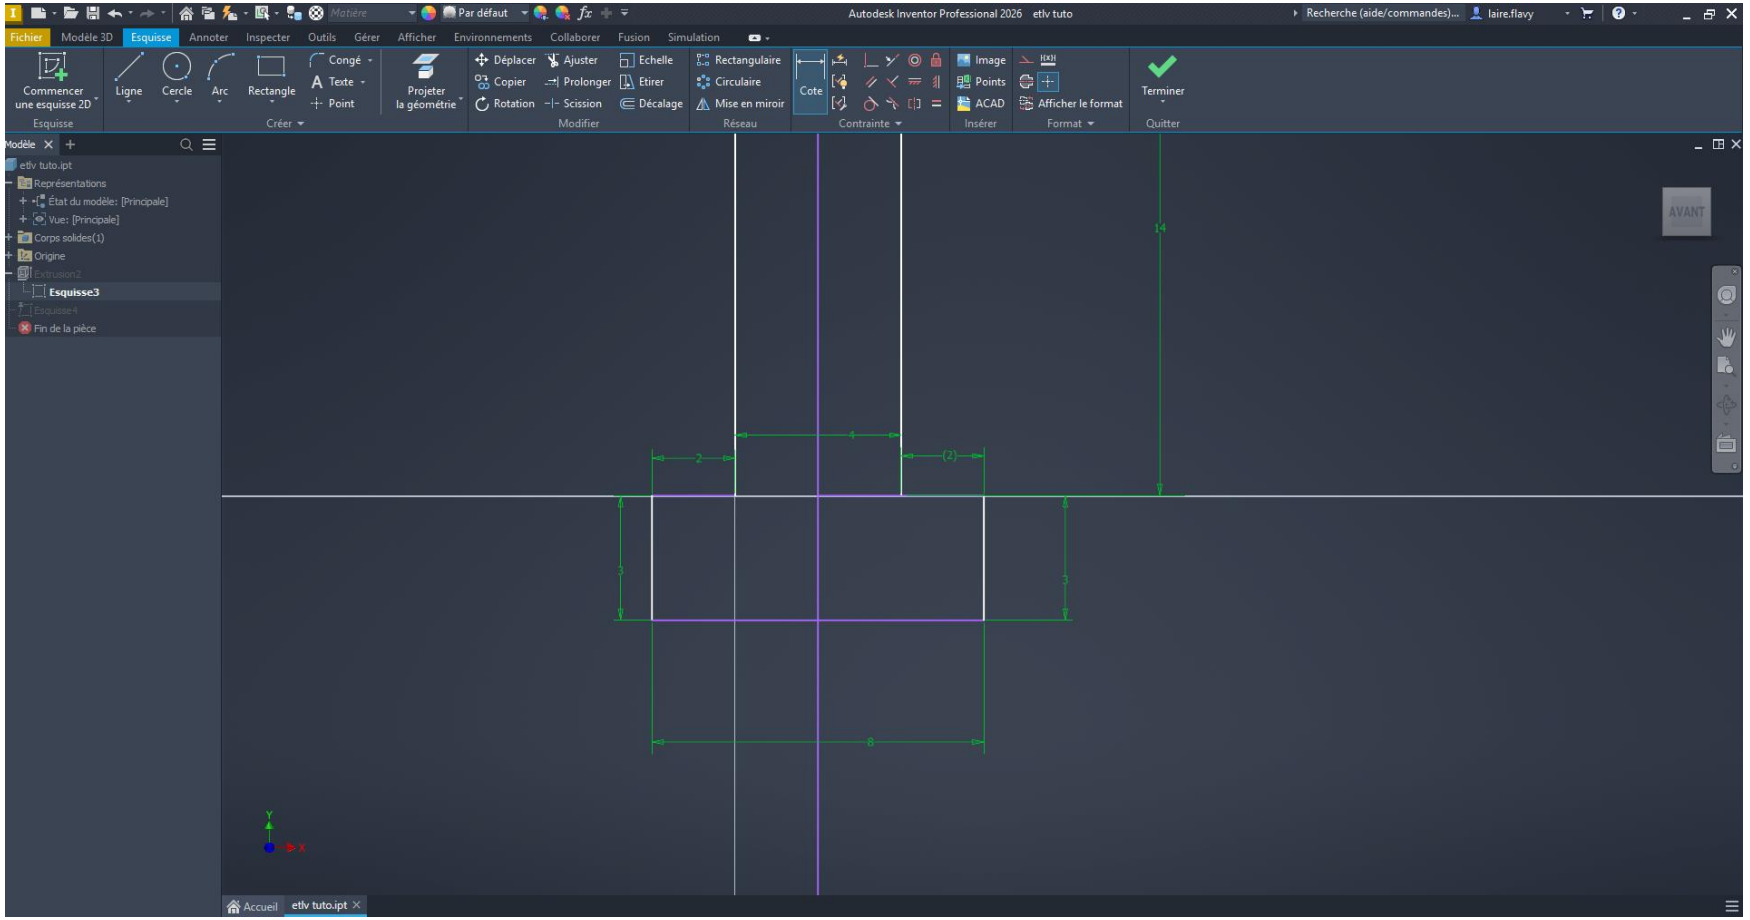

Extrude the shape by 0,2mm

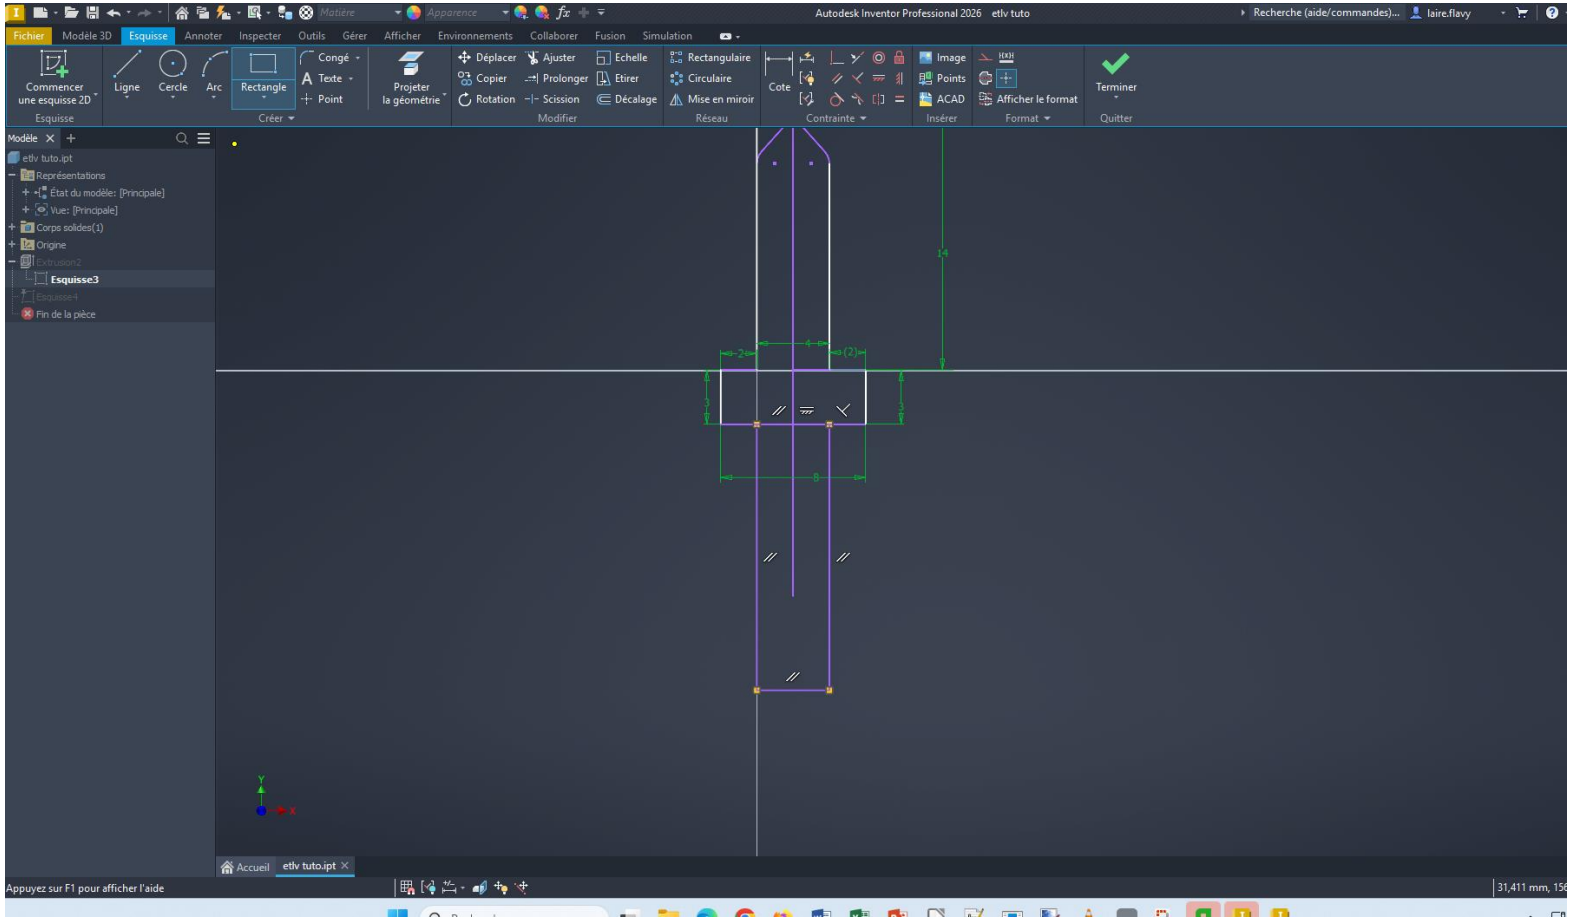

On a new sketch, draw a rectangle

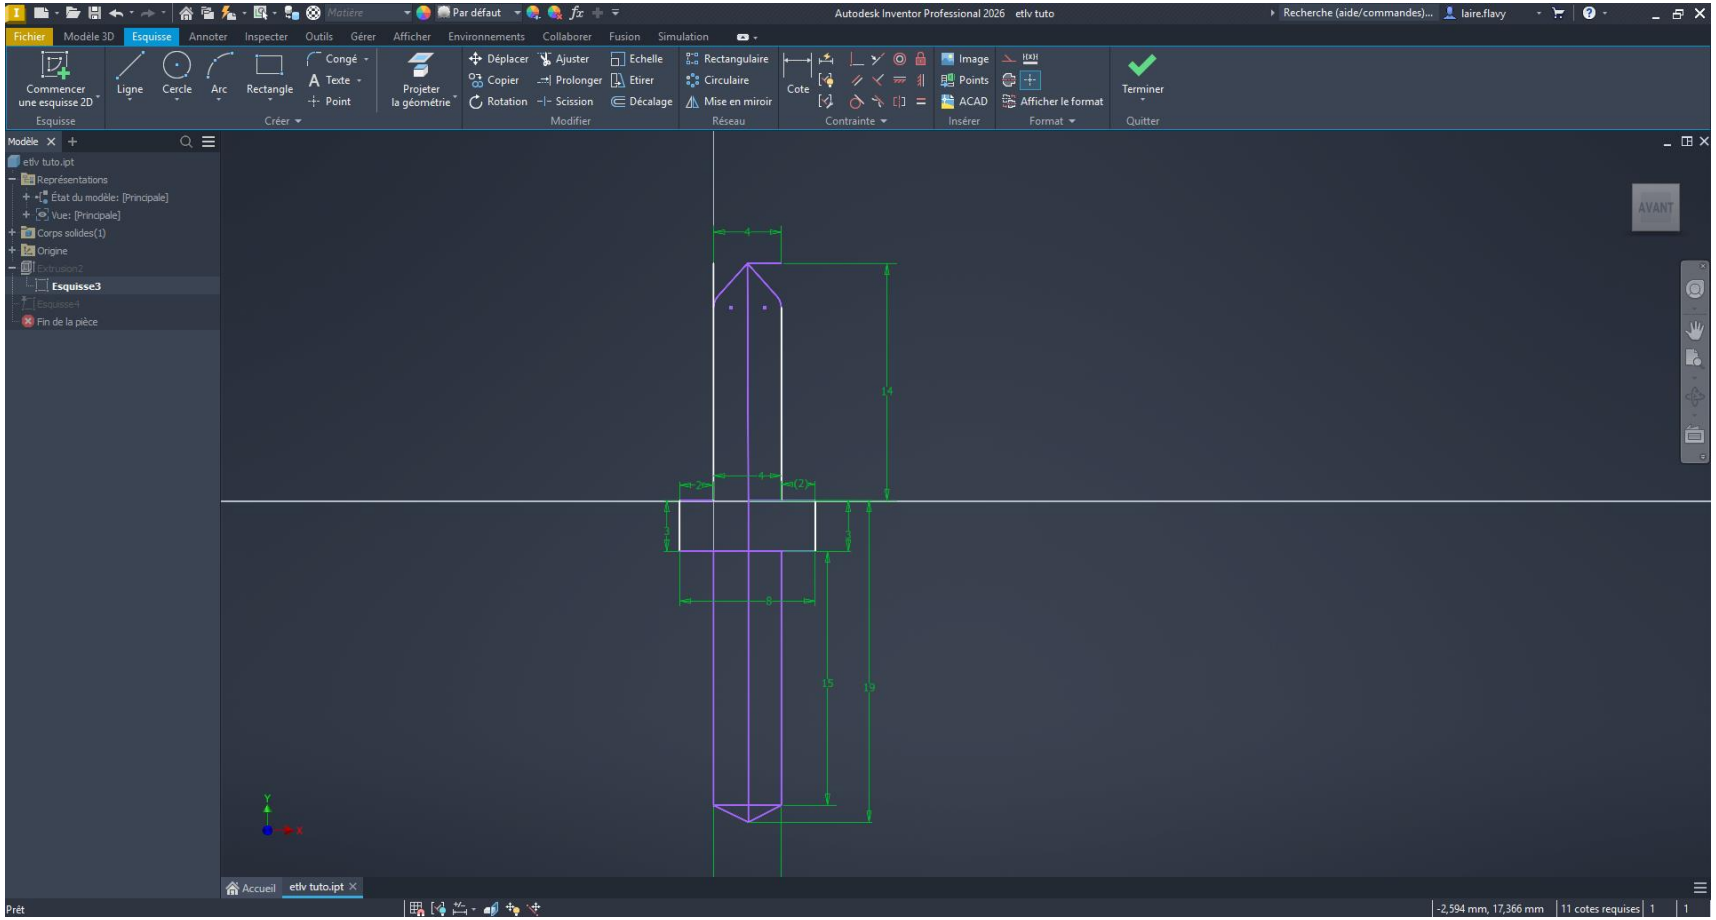

3mm high and 8mm wide

Draw one last rectangle, 15mm high and 4mm wide

Draw the middle line of the rectangle, then use the line tool again to createe a small point at the bottom

Finish by extruding the entire shape by 0,2mm
